DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 11-15 and 108-115 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 4-7 and 9-20 of U.S. Patent No. 6,734,455 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the same combinations of claim elements are present in the patent to form the same structure as are in the pending claims.

- a. For example, claims 1, 9 and 11 of the Patent combine to form claim 11 of the instant claims. The "dopant material" of the patent claim 1 is further defined to be a metal in patent claim 9, which is the same as the "metal layer" in pending claim 11.

- b. Other claims match up more clearly between the two claim sets. For example, claim 13 of the pending claims is very similar to claim 14 of the patented claims.

Response to Arguments

- 3. Applicant's arguments filed 06/30/05 have been fully considered and they are persuasive.

- c. The Double Patenting rejection in the previous action was erroneous at least for the reasons pointed out by applicant. The claims of Application No. 10/758,008 were a divisional of Application No. 09/809,331. The claims of the latter application had been restricted between two patentably distinct inventions. Therefore, a rejection using one set of claims to reject another is forbidden.

- d. However, this current rejection is more accurate. When a continuation is filed, the new claims cannot be substantial equivalents of previously patented claims, else a double patenting issue arises. In this case, such an issue is present. The pending claims of 10/758,009 are substantially similar or the same as the claims in patented application 09/809,331.
